- **Programming:** Python, Java
 - **Web:** HTML, CSS
 - **Database:** MySQL, SQLite (CRUD, Joins, basic queries)
 - **Software Testing & Concepts:** Software Testing fundamentals, SDLC, DBMS, RDBMS, OOPs
-

PROJECTS

AI-Powered Interview Fairness System | Python, Streamlit, SQLite

- Developed a Streamlit-based HR portal with SQLite authentication for uploading and analyzing interview question datasets from CSV/PDF files.
- Implemented TF-IDF based relevancy scoring to match interview questions with job descriptions and organize questions by difficulty level.
- Generated downloadable interview question papers with PDF/CSV export and interactive Plotly-based analytics dashboards.
- Added automated email delivery for consolidated interview question sets.

TrendScope-YouTube Intelligence Dashboard | Python, Data Analytics

- Collected YouTube video metrics such as views, likes, and comments using the YouTube Data API.
- Performed data cleaning and trend analysis using Pandas and interactive visualizations.
- Conducted sentiment analysis on viewer comments to analyze audience reactions and engagement patterns.
- Experimented with time-series forecasting models for predicting video view trends.
